Werk in
Finale Emilia

Das **Werk Fiorano Modenese** wurde im Jahr 1976 gegründet.

Hier werden Produkte aus gepresster Linie mit natürlichen Kanten und Vertikalisierung im kleinsten Format hergestellt.

Die Produktion ist ganz auf Feinsteinzeug ausgerichtet, und wir bezeichnen dieses Werk als die "Drehscheibe des gepressten Feinsteinzeugs".

Im Inneren dieser Hallen befinden sich vier Pressen, die ihre Produktivität auf vier Glasurlinien und zwei Doppelkanal-Brennlinien verteilen, so dass bei vollem Betrieb eine Gesamtproduktivität von 7,5 Millionen Quadratmetern

Endprodukt erreicht wird.

Die wichtigsten Formate, die produziert werden, sind:
30x120, 20x120, 15x60, 30x60, 34x34,
21,6x21,6, 21,6x43,5, 22x22, 20,3x90,6,
45x45, 40x60.

Werk in Fiorano Modenese
135 Mitarbeiter

GRUPPO
MOMA
ceramiche

Das **Werk in Sassuolo** soll im Jahr 2021 übernommen werden. Die Anlage ist eine der ältesten in der Region und eines der Symbole für die Geschichte der italienischen Keramikindustrie.

Nach einer Reihe von Investitionen, die auf die Erneuerung der Industrie 4.0 abzielen, nennen wir dieses Werk das "Schleifzentrum".

Dank der neuen Pressen und der Integration der neuesten Generation des Trockenschleifens können wir Feinsteinzeug in 2 cm Stärke und traditioneller rektifizierter Stärke herstellen.

In diesen Hallen erreicht die Produktivität bei vollem Betrieb 4 Millionen Quadratmeter Fertigware.

Die produzierten Formate sind:
60x120 (auch 2 cm), 30x120, 20x120, 90x90 (auch 2 cm), 40x80 (auch 2 cm),
60x60 (auch 2 cm), 30x60..

Die Herstellung von Feinsteinzeug

GRUPPO
MOMA
ceramiche

Feinsteinzeug macht 92% des Produktportfolios des Bezirks aus.

Die nationalen Statistiken zeigen, dass die produzierten Quadratmeter im Jahr 2022 um 22.4% gestiegen sind, und die Volumen auf 392.7 Millionen Quadratmeter gestiegen sind.

Die Investitionen, dass wir in den letzten vier Jahren getätigt haben, gebracht das Unternehmen sehr wettbewerbsfähig auf der Produktionsseite gemacht und die Produktion auf ein Volumen von 11,5 Millionen Quadratmetern.

Heute gehört die Produktion zu den ersten Unternehmen im Bezirk.

Die Vorteile von Feinsteinzeug

Im Vergleich zu alternativen Materialien (z. B. Vinyl, Parkett oder Laminat) weist Feinsteinzeug noch heute unübertroffene Eigenschaften auf wie:

- **Festigkeit:** Es ist ein hartes Material, das Abrieb, Kratzern und Rissen gut standhält.
- **Wasserdichtigkeit:** Dank einer hohen inneren Kohäsion bietet die Seite keine Möglichkeit des Eindringens von Flüssigkeiten.
- **Sicherheit:** Es kann kein Feuer fangen, weil es nicht brennt, sogar hat es die Fähigkeit um Flammen zu hemmen.
- **Gesundheit:** Es handelt sich um ein Material, das Keime, Staub und Staub nicht zurückhalten kann.

- **Eklektizismus:** Um die Auswahlmöglichkeiten zu erweitern, werden Fliesen in einer Vielzahl von Formaten hergestellt, von wenigen Zentimetern bis zu ein Metern und auch mehr.
- **Vielseitigkeit:** das Feinsteinzeug ermöglicht Ihnen, in Ihrem Haus den ganzen Charme von teuren Materialien wie Marmor oder Holz zu einem Kosten deutlich niedriger als das "Original" zu haben.
- **Wirtschaftlichkeit:** Im Wettbewerb mit anderen Materialien, gewinnt die Keramik durch ihre Wirtschaftlichkeit.

Das **Werk Finale Emilia** bündelt die gesamte die ganze Kraft der Produktion von Beschichtungsmaterialien.

Die Beschichtung ist das Erkennungsmerkmal von Moma und die DNA, die es uns heute ermöglicht, fast ein Monopolhersteller in Italien zu sein. Das Werk ist gemessen am Volumen das erste in Italien und eines der ersten in Europa.

Vier Produktionslinien, acht Öfen (4 zum Trocknen und 4 zum Brennen), fünf Pressen und vier digitale Glasierpressen treiben die Produktion auf 12 Millionen Quadratmeter pro Jahr.

Das Verfahren definiert ein zweigleisiges Angebot: den traditionellen Zweibrand aus dem 0-km-Land des Gebiets und den feinen weißen Scherben, der bis 2022 den Mehrwert des Trockenschleifens haben wird.

Die produzierten Formate sind: 20x20, 20x45, 20x40, 20x50, 20x60, 25x33, 25x40, 25x60, 25x75 (rektifizierter Weißmantel und traditioneller weißer Scherben), 30x60 (nur rektifizierter weißer Scherben).

Werk in Finale Emilia
152 Mitarbeiter

Die Herstellung der keramischen Beschichtung

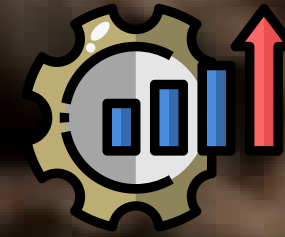

Laut der nationalen Statistik der Confindustria Ceramics (ISN 2022) wurden in Italien 16 Millionen Quadratmeter doppelt gebrannter Keramik im Vollzyklusverfahren hergestellt.

Im Vergleich zu 2020 (Covid) verzeichnet das Jahr 2022 einen weiteren Produktionsanstieg von 3,4 %.

Unsere Produktion beträgt 12 Millionen Quadratmeter Doppelbrand, und auf der Grundlage der oben genannten Statistiken wäre Moma in der Lage, 75 % der Nachfrage zu decken.
